

About SSTAC

Shalom Science and Technology Academy (SSTAC) is a first of its kind pure science and technology Academy in Nigeria. It is located in the regional hub of Enugu state precisely in industrial layout Emene, Opposite PRODA. One of the numerous selling points of SSTAC is that the college has come at a time when it has become clear that a developing country like Nigeria needs as much individuals with the knowledge and practical implementation of science and technology who would lead the way in these fields (Medicine, Science, Agriculture, Engineering and Technology etc).

Highlights

Some of the highlights of SSTAC are:

1. Fully Equipped Science Laboratories and Technology workshops
2. Over 36 years of Experienced leadership and Management team with international affiliations
3. A world class yet friendly campus environment
4. First class accommodation with ensuite facilities
5. A sister college to Shalom Academy Nsukka (SAN) which has represented Nigeria in the International Olympiad competitions in India 2008 and Japan 2009
6. Creative team with an impressive list of technical skills
7. Purpose built Information Communication Technology (ICT) Hub
8. Emphasis on Creativity, Innovation, Science, Technology, Engineering and Entrepreneurship (CISTEE) Etc.

Objectives

Achievable objectives of SSTAC are:

- a. Leading the way in training and developing scientifically, technologically and computer literate students in Nigeria
- b. A global college that will produce the best brains to help in leadership and development agenda of Nigeria
- c. Raising students who would represent Nigeria internationally in science, technology and computing competitions.

Keys to Success

Our major key to success in Shalom Science and Technology Academy (SSTAC) lies in our continuous emphasis and practical leadership style in the aspect of discipline, hard work, fear of God and the strict adherence to the coverage of curricular content of the school.

SSTAC Vision (Continuation)

Shalom Science and Technology (SSTAC) vision came as a result of it's sister college Shalom Academy Nsukka (SAN) winning the national Olympiad competition consecutively in 2008 and 2009 in Biology and Physics respectively proceeded to represent Nigeria in India 2008 and Japan 2009. Unfortunately, the obvious deficiency when it came to practical implementation of biology and Physics using 21st century equipment meant that they couldn't perform on the world stage even after scoring high on theoretical knowledge. Therefore to avoid a repeat and to ensure that the country is made proud on the next outing, the management of Shalom Schools Limited embarked on this gigantic feat by leading the way through a first of it's kind pure science and technology academy. In the U.K. such colleges are called University Technical college (UTC).

Therefore she intends to educate and train STEM literate students who will collaborate to solve real life-national problems utilizing inquiry-based materials.
